Samad Kausar

FULL STACK DEVELOPER (FRONTEND HEAVY)

+91 7317368358 | samadkausar786@gmail.com | github.com/PotatoTummy | stack-it.tech |

Gorakhpur, Uttar Pradesh, India

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of hands-on experience architecting high-performance web applications, distributed microservices, and mobile apps. Specializing in frontend-heavy full stack development across React.js, React Native, TypeScript, Next.js, and Node.js/NestJS. Proven track record delivering complex multi-portal enterprise platforms (Nestys Seller Central, Eureka, Super Admin), real-time gaming backends and mobile apps (WoKataa), algorithm-free cinematic media players (Scrollr / LinkPlay), and production client infrastructures (Earth Air Condition). Strong advocate for clean architecture, type safety, low-latency state synchronization, and frontend performance optimization.

CORE COMPETENCIES

React & Next.js | NestJS & Microservices | React Native | TypeScript | Redux Toolkit & Zustand | Redis & BullMQ Queues | PostgreSQL & Prisma ORM | Frontend Performance

WORK EXPERIENCE

Stack-IT Technologies

April 2026 - Present

Full Stack Developer (Frontend Heavy)

Remote / Hybrid

- Spearheaded frontend architecture and backend service integration across the **Nestys** multi-portal e-commerce and opportunities ecosystem.
- **Nestys Seller Central**: Developed comprehensive vendor portal covering order management, real-time inventory tracking, shipping workflows, financial earnings dashboards, and WYSIWYG product publishing using React 18, TypeScript, Redux Toolkit, React Hook Form, Zod, and TipTap.
- **Nestys Eureka Platform**: Built enterprise candidate and opportunity management portal with dynamic multi-filter application views across listings, status tracking, and bulk data import pipelines.
- **Nestys Super Admin**: Engineered central operations console with role-based access control (RBAC), HLS.js adaptive video streaming for reels moderation, user/seller lifecycle management, and visual analytics powered by ApexCharts.
- **Nestys Microservices Backend**: Contributed to distributed microservice architecture utilizing NestJS, Prisma ORM, PostgreSQL, Redis caching, BullMQ message queues, AWS RDS/ElastiCache, and Dockerized environments with Nginx reverse proxy.

W3villa Technologies

May 2024 - December 2025

Software Developer

Noida, India

- Developed scalable web applications and enterprise dashboards using React.js and React Native.
- Delivered frontend systems for the **Servotech Enterprise Suite**: PM Board (project management and sprint tracking), HRMS (employee management and attendance), Asset Management (high-performance CRUD, multi-parameter filtering, full-text search), and Applicant Tracking System (ATS recruitment workflows).
- Implemented secure REST API integrations, OAuth 2.0 authentication workflows, and frontend performance optimizations (code-splitting, memoization, lazy loading).
- Automated test suites using Cucumber for end-to-end integration and regression testing.

KEY PROJECTS

Scrollr | LinkPlay -- Cinematic Mobile Video Reel Player & Media Resolver API

Engineered Android-first cinematic mobile video player transforming device folders and social media links into an algorithm-free reel experience with Unified Playback Engine (expo-video, Fisher-Yates memory shuffle, 60fps virtualized gallery) paired with a high-throughput

Fastify/yt-dlp Media Resolver API providing HTTP byte-range proxy streaming.

Expo SDK 54, React Native 0.81, TypeScript, Hermes Bytecode, expo-video, Zustand, Fastify, yt-dlp, Vitest, Zod

WoKataa (Kite Clash) -- Real-Time Competitive Gaming App & Scalable Backend

Architected end-to-end real-time mobile gaming platform and microservice backend with gesture-driven swipeable token decks, dynamic perspective scoreboards, dual real-time layer (Ably Cloud & Socket.IO), and BullMQ background worker queues.

React Native 0.74, TypeScript, Kotlin, Node.js, Express, PostgreSQL, Prisma ORM, Redis 7, Ably Realtime, Socket.IO, BullMQ, Reanimated 3

Earth Air Condition -- Commercial HVAC Web Platform & Infrastructure

Engineered production web platform and Earth Air Command Center client admin suite with automated zero-downtime CI/CD via GitHub Actions and FTPS, Model Context Protocol (MCP) PKCE OAuth2 authentication, and HTTP 410 Gone spam defense firewall.

WordPress, PHP 8, Semantic HTML5, CSS3, Vanilla JavaScript, GitHub Actions, MCP, JSON-LD

UrbanArena -- Sports & Venue Booking Ecosystem

Architected full-stack multi-tenant sports facility reservation platform with customer web app, service provider portal, admin panel, real-time slot scheduling, and dynamic QR code ticket validation.

React 18, Vite, TypeScript, Tailwind CSS, Radix UI, TanStack Query, Zustand, NestJS, Neon Serverless PostgreSQL, Prisma ORM, Upstash Redis

EDUCATION

B.Tech in Computer Science Integral University 2020 - 2024

CGPI: 9.5

TECHNICAL SKILLS

Frontend: React.js, React Native, TypeScript, JavaScript (ES6+), Next.js, Redux Toolkit, Zustand, HTML5, CSS3, Tailwind CSS, Radix UI, React Hook Form, Zod, TipTap, ApexCharts, HLS.js, Expo, Reanimated

Backend & APIs: Node.js, NestJS, Express.js, Fastify, RESTful APIs, Microservices Architecture, Socket.IO, Ably Realtime

Databases & ORM: PostgreSQL, MySQL, Prisma ORM, Neon Serverless, Redis, Upstash

Cloud & DevOps: Docker, Docker Compose, Kubernetes, AWS (S3, RDS, ElastiCache), Cloudflare R2, Nginx, GitHub Actions (CI/CD), FTPS, Linux/macOS

Testing & Tooling: Jest, Vitest, Cucumber, Vite, Postman, Swagger / OpenAPI, yt-dlp

Auth & Security: JWT, Passport.js, OAuth 2.0 (Google, Facebook, PKCE), RBAC, SSRF Protection, Helmet
